SUMMARY

Computer Science and Engineering undergraduate (2027) building backend and full-stack applications with TypeScript, Node.js, PostgreSQL, and Docker. Developed a deployed academic archive with local OCR and an AI email assistant with human approval. Uses AI-assisted development while owning architecture, integration, debugging, and code review.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript
Backend: Node.js, Fastify, RESTful APIs, Next.js Server Actions, Middleware, Zod Validation, Background Jobs (BullMQ)
Frontend: React, Next.js (App Router), React Native, Expo, HTML5, CSS3, Tailwind CSS, Vite
Databases: PostgreSQL, Prisma ORM, Redis
Security & Authentication: OAuth 2.0, Role-Based Access Control (RBAC), TOTP 2FA, CSRF Protection, bcrypt, Argon2id
Testing & CI: Vitest, Playwright, Unit, Integration and End-to-End (E2E) Testing, GitHub Actions (Continuous Integration)
DevOps & Tools: Docker, Docker Compose, Caddy, Render, Git, GitHub, Postman, VS Code
Familiar with: Express.js, MongoDB, Mongoose, JWT, SQLite, Core Java

PROJECTS

PaperVault - College Question-Paper Archive | papervault.duckdns.org | github.com/alexinwebs/papervault
Next.js, React, TypeScript, PostgreSQL, Prisma, Redis, Tesseract, Poppler, Sharp, ClamAV, Docker Compose

- Built and deployed a moderated question-paper archive with hierarchical browsing, paginated search, PDF-text search, and multi-branch paper listings using Next.js Server Actions and PostgreSQL.
- Integrated local PDF extraction and optical character recognition (OCR) using unpdf, Poppler, Tesseract, and Sharp to suggest editable academic metadata, with bounded processing, timeouts, and manual-entry fallback.
- Implemented ClamAV scanning, file-hash and extracted-text duplicate checks, database locks for concurrent submissions, and transactional group creation; enforced human moderation before publication.
- Protected access with college-scoped RBAC, revocable sessions, bcrypt, admin TOTP 2FA, and Redis rate limiting. Configured GitHub Actions for unit, integration, browser tests, dependency audits, image builds, and CodeQL; deployed with Docker Compose and Caddy HTTPS.

VIBE - Driver-First Ride-Hailing Prototype | github.com/alexinwebs/vibe
React Native, Expo, TypeScript, React Navigation, Node.js, Fastify, REST API, pnpm workspaces

- Built Rider and Driver React Native (Expo) apps and a Node.js and Fastify REST API in a pnpm workspace monorepo, sharing data contracts through a @vibe/types TypeScript package.
- Implemented the ride workflow in the API (Searching, Driver Assigned, Driver Arriving, Ride Started, Ride Completed) with driver online/offline availability, ride history, and server-side fare and earnings calculation.
- Designed a driver-first commission model across bike, auto, and cab services: 0% commission on VIBE+ rides and 15% on Free rides; prototype using in-memory storage, not deployed.

MailPilot - Self-Hosted AI Email Assistant for Gmail | github.com/alexinwebs/mailpilot-ai
React, TypeScript, Vite, Node.js, Fastify, PostgreSQL, Prisma, Zod, Redis, BullMQ, Docker Compose

- Built a solo, MIT-licensed assistant that syncs Gmail through Google OAuth 2.0 and the Gmail API, reconstructs threads, classifies messages, detects reply-needed emails, and drafts and critiques replies with LLMs.
- Designed a human-in-the-loop workflow where LLM output is validated with Zod and checked by a deterministic policy engine before human review; the model never sends email, and sends are idempotent.
- Developed 25 RESTful API endpoints, 15 Prisma models, a 9-route React dashboard, 6 LLM provider integrations, Redis/BullMQ background jobs, and AES-256-GCM encrypted OAuth tokens; verified on a live Render deployment.

EXPERIENCE

Technical Intern (Training Program) | Netcamp Solutions Pvt. Ltd., Ghaziabad | Jun 2026 - Jul 2026

- Trained in Network Management, Android with Core Java, Web Development, and Ethical Hacking Fundamentals.

EDUCATION

Bachelor of Technology, Computer Science and Engineering | 2023 - 2027 (Expected)
Raj Kumar Goel Institute of Technology, Ghaziabad (Affiliated to AKTU)
Relevant Coursework: DBMS, Operating Systems, Computer Networks, OOP, Software Engineering, Data Structures and Algorithms

CERTIFICATIONS

- Generative AI - NASSCOM Skill Development Program, 2026
- AI For Everyone - DeepLearning.AI / Coursera, 2026
- Software Engineering & Agile Software Development; Agile Scrum in Practice; Introduction to Data Science - Infosys Springboard, 2026
- Android with Core Java; Network Management & Web Development with Ethical Hacking - Netcamp / RKGIT, 2026
